mzkhan886@gmail.com | <https://mizuka.app> | GitHub: @zahooruddin-dev | Remote / Pakistan

SUMMARY

Founding Full-Stack Engineer specializing in end-to-end delivery of enterprise AI applications. Expert in architecting real-time systems with React, Node.js, and PostgreSQL, focusing on multi-LLM orchestration and secure authentication. Dedicated to building robust, high-impact EdTech infrastructure that drives operational efficiency.

WORK EXPERIENCE

Founding Engineer (Full-Stack) | Mizuka Enterprise | Mizuka.App

Apr 2025 - Present

- Architected end-to-end enterprise infrastructure for Mizuka Connect, Edu Portal and Assessment Platform using React, Node.js, and PostgreSQL.
- Developed AI-driven tools for automated grading and exam generation, resulting in a reported 70% reduction in teacher workload.
- Integrated Socket.io for real-time messaging and Cloudinary for voice message storage and processing.
- Implemented JWT authentication and Zod schema validation to secure API routes and ensure data integrity.
- Managed the Software Development Life Cycle (SDLC) from initial concept to MVP launch.

Freelance Web Developer | Self-Employed

Sep 2024 - Sep 2025

- Engineered responsive, SEO-optimized web applications for small businesses, managing the full lifecycle from secure cloud deployment to long-term infrastructure maintenance.
- Developed custom booking systems featuring automated spam prevention and comprehensive admin dashboards for real-time finance tracking and customer relationship management.
- Integrated third-party accounting APIs and SaaS automation tools to streamline financial workflows and support scalable business operations.

Front-end developer | Aruma software agency

Nov 2023 - Jul 2024

- Migrated 7 React.js projects to Vite, reducing build times from 1.5 seconds to near-instant execution.
- Improved performance and development speed by refactoring legacy code and optimizing operations on hardware like Raspberry Pi.
- Managed the full Software Development Life Cycle (SDLC) from concept to MVP launch, incorporating targeted engagement features like newsletter popups to drive email marketing campaigns.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

March 2026 - Present

- Virtual University of Pakistan (Federally Chartered)

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), React.js, Node.js, Express.js, Socket.io, HTML/CSS, Tailwind CSS, Zod (Validation).
- **Backend & Security:** JWT (JSON Web Tokens), Bcrypt, Stateless Authentication, RESTful APIs, Middleware development.
- **Cloud & Database:** PostgreSQL (Neon), MongoDB, Firebase, Cloudinary (Media Management), Cloudflare Workers, SQL
- **AI/ML:** LLM integration, prompt engineering, AI assessment systems, model orchestration
- **Tools:** Git/GitHub, VS Code, Co-pilot
